

Case Study

Hiranandani Fortune City, Panvel, MH

Current Challenges

One of the most prestigious real estate developers based in Mumbai, The Hiranandani Group has a vision of creating a new India with self-sufficient and enduring townships. The Group is primarily synonymous with quality, reliability, and excellence in architecture and commitment towards customers. They believe in giving the experience of a lifetime to every family. Hiranandani fortune city is one of the biggest gated communities located in Panvel. The developer faced challenges relating to multiple service providers for each service the residence opt for like telephone, internet, broadcasting TV Channels, and more. Most of the time the building terraces are cluttered with multiple dish antennas, each service provider lay their independent cable to each residence for the service. These cables spoil the look of the building exteriors/interiors besides fire and rodent hazards.

The Need

The Hiranandani Fortune City with many NRI and HNI's residences wanted one unified service provider who can offer all these multiple-service providers converged to one, ease of selecting the service, and simplified payment options.

Solution Provided

After carefully understanding the challenges faced by the builder who is committed to providing The Best in Class amenities to its customers, One Touch Infratel was selected to provide the next-generation network with the unified service provider platform for Voice, data, and Video for Hiranandani Fortune City Panvel under FTTH.

Summary

One Touch Infratel worked with Broadband & Telephony services partners and technology partners in integrating all the multiple service providers seamlessly to bring about a change in experience which the residents can use it ease and select the service provider of their choice and single window payment.
